

Transforming Manufacturing Process with Xtrakt™ WDM

Challenges:

- Weighing Scale Data Integration with ERP: a pressing concern
- Manual Data Entry Errors: a constant source of worry
- Real-Time Data Unavailability: a lack of immediate corrective action
- Need for eliminating deviations in precise weighing of material

Our Solutions

- Xtrakt™ WDM flawlessly records and traces every input raw material, ensuring full traceability throughout the production process.
- Precision is non-negotiable, and our solution guarantees exact capture of the quantity of materials used in each production run.
- A digital time stamp for every activity created a clear chronological record of their operations.
- Digital Data Recording with Real-Time Validation.
- Immediate Label Printing After Activity Completion.

Benefits

- Xtrakt™ WDM, streamlines the production planning with real-time data access, allowing for immediate adjustments and smarter decision-making.
- Eliminates human error by scanning and digitizing data, improving data accuracy and compliance.
- Ensures precision & accuracy in weighing at every step of the manufacturing process.
- Simplifies operations with an intuitive interface that reduces the learning curve and enhances overall efficiency.
