

## Xtrakt™ Mini Rescues Food & Beverages Industry from Costly Oil Filling Errors

### Challenges:

- The customer was having trouble with instances of accidentally filling containers with the wrong type of oil.
- This resulted in product quality difficulties, consumer complaints, and increased disposal expenses.
- They lacked a comprehensive validation mechanism to avoid incorrect oil filling.

### Our Solutions

- Xtrakt™ Mini developed a thorough process flow that effectively prevented the wrong type of oil from being put into the wrong type of container.
- This comprehensive process validation system avoided the possibility of incorrect filling by ensuring that only the appropriate oil was used for each container.

### Benefits

- Production planning became more effective and predictable.
- The solution included scanning technology to guarantee that the correct oil was used for each container, reducing costly mistakes and waste.
- The customer greatly decreased the consequent manufacturing of faulty goods by using machine interlock.
- The user-friendly interface of the Xtrakt™ Mini expedited processes, making it easy for operators to ensure the correct oil was utilized for each container.
